

Rep. Linda Sánchez released the following statement regarding the National Alzheimer's Project Act:

I rise today to support S. 3036, the National Alzheimer's Project Act. This bill would provide critical federal support and coordination to overcome the growing Alzheimer's crisis.

Today, the effects of Alzheimer's disease are devastating. An estimated 5.3 million people are living with the disease. We must act decisively, or the devastation of Alzheimer's disease will grow far worse. Alzheimer's disease is the sixth leading cause of death in the United States, and is the fastest growing of the 10 leading causes of death. In 2010, Medicare and Medicaid will spend \$122 billion caring for people with Alzheimer's disease and other dementias

The National Alzheimer's Project Act would establish an inter-agency advisory council to address the government's efforts on Alzheimer's research, care, institutional services, and home and community-based programs. It would also increase awareness, support, and outreach for those confronted with Alzheimer's disease and for their families to help better equip our nation to face this disease.

To decrease health disparities, this bill will work to ensure the inclusion of ethnic and racial populations who are at higher risk for Alzheimer's or who are less likely to receive care in clinical, research, and service programs.

Legislation that advances a cure for Alzheimer's disease is near and dear to my heart because of my father and the millions of others like him who live every day with this disease.

I urge my colleagues to support such a critical piece of legislation. It's a monumental step forward in our battle against Alzheimer's and other dementias. Thank you.
